

FAWAS P

B.Tech Artificial Intelligence & Data Science Student

Pallipath House, CH nagar, Sreekandapuram- 670631, Kannur, Kerala

+91 9526868948 — fawasp6456@gmail.com

LinkedIn: linkedin.com/in/fawas-p-9b2ba0417 — GitHub: github.com/fawasp6456-boop

Professional Summary

Artificial Intelligence and Data Science undergraduate with hands-on experience in Machine Learning, Deep Learning, Computer Vision, and Behavioral Analytics. Skilled in Python, SQL, TensorFlow, and datadriven problem solving. Experienced in developing AI-powered solutions through academic projects and internship training. Seeking opportunities to apply technical expertise in Artificial Intelligence, Data Science, and Software Development while contributing to innovative technology-driven organizations.

Education

Bachelor of Technology (B.Tech) – Artificial Intelligence & Data Science

CGPA: 7.13

Vimal Jyothi Engineering College, Chemperi, Kannur

APJ Abdul Kalam Technological University (KTU)

2023 – 2027

Higher Secondary Education (Plus Two)

Percentage: 80.83%

Govt. KPC Higher Secondary School Pattanur, Nayattupara

2021 – 2023

Central Board of Secondary Education (CBSE)

Sal Sabeel Public School, Sreekandapuram

2021

Percentage: 76.2%

Technical Skills

Programming Languages: Python, C, Java (Basic), SQL

Artificial Intelligence & Data Science: Machine Learning, Deep Learning, Computer Vision, Data Analysis, Data Visual Engineering, Behavioral Analytics

Libraries & Frameworks: TensorFlow, Keras, OpenCV, NumPy, Pandas, Matplotlib, Scikit-learn

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, MySQL

Internship Experience

Machine Learning Intern — Neovent Innovations

June 2025

- Completed a four-week Machine Learning internship program.
- Worked on data preprocessing, model development, and evaluation techniques.
- Applied machine learning concepts to practical analytical problems.

- Strengthened knowledge of supervised learning, model optimization, and performance assessment.

Projects

AI Generated vs Real Image Prediction | Machine Learning Project

- Developed a CNN-based image classification system to distinguish AI-generated images from real images using Python and TensorFlow.
- Worked with a dataset of over 79,000 labeled images for model training and evaluation.
- Applied advanced image preprocessing techniques including Wavelet Transform, DCT, and Gabor Filtering for feature extraction.
- Built and trained a deep learning model using an 80:20 train-validation split for binary image classification.
- Contributed to AI content authenticity and deepfake detection by developing an automated image verification system.

Clinical Decision Support System (CDSS) Using Explainable AI and Neuro-Symbolic AI

- Developed a Clinical Decision Support System (CDSS) for diabetes risk assessment.
- Applied Machine Learning and Explainable AI (XAI) for accurate and transparent predictions.
- Integrated Neuro-Symbolic AI to combine AI predictions with medical reasoning. Built an interactive dashboard and user-friendly interface for healthcare data analysis and risk prediction.
- Built a user-friendly web application using Python and Django.
- Generated interpretable clinical insights to support healthcare decision-making..

Certifications

- AICTE-IBM SkillsBuild Gen AI & Cloud Computing Internship
- Machine Learning Internship Training program – Neovent Innovations
- NEXTGENAI Induction Program – Lets Code AI
- Certificate of Completion in System Designing Using Arduino

SoftSkills

Problem Solving, Analytical Thinking, Team Collaboration, Communication, Adaptability, Continuous Learning

Languages

Malayalam (Native), English (Professional Proficiency)
